## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of copending Application No. 09/213,856. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims includes the limitations of predetermining a plurality of speech commands associated with a corresponding plurality of system actions, detecting speech commands and words associated with speech commands, displaying speech commands, performing the corresponding system action if a particular command is selected. Application No. 09/213,856 does not teach detecting speech queries for locating commands or locating commands applicable to the query. Refer to Gould et al. (US Patent No. 6,088,671) who teach a computer system having speech recognition functionality for continuous recognition of text and commands which upon recognizing a phrase ("What can I say"), displays the recognized phrase and provides a list of voice commands available for the application being executed (col. 8, lines 3-16).

3. Therefore, it would have been obvious to one of ordinary skill at the time of invention to modify the speech recognition system of Application No. 09/213,856 to recognize speech queries and display a list of voice commands applicable to the speech query, for the purpose of providing visual notification of the available voice commands for a particular application being executed, as taught by Gould et al.

4. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claims 1-4, 6-9, and 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Gould et al. (US Patent No. 6,088,671).

7. Regarding claims 1, 6, and 11,

Predetermining a plurality of speech commands each associated with a corresponding plurality of system actions is taught by Gould et al. at col. 4, lines 26-67; col. 5, lines 1-2;

Carrying out the system action corresponding to the command is taught by Gould et al. at col. 4, lines 26-67; col. 5, lines 1-2;

Concurrently detecting speech commands and speech queries is taught by Gould et al. at col. 5, lines 3-16;

Attempting to locate commands applicable to said query is taught by Gould et al. at col. 5, lines 3-16

8. Regarding claims 2, 7, and 12

Displaying detected speech query is taught by Gould et al. at col. 5, lines 3-16; Figures 5, 6, 8A, 8B, 9A, 9B;

Art Unit: 2641

9. Regarding claims 3, 8, and 13

Displaying located commands is taught at col. 5, lines 3-16; Figures 5 & 6;

10. Regarding claims 4, 9, and 14

User may speak a displayed located command to activate said means for carrying out a system action is taught by Gould et al. at col. 5, lines 3-16.

*Response to Arguments*

11. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela A. Armstrong whose telephone number is 703-308-6258. The examiner can normally be reached on Monday-Thursday 7:30-5:00 PM.
